Jan Vidovič

Full-Stack Developer · Computer Technician Student

Maribor, Slovenia | jan.vidovic06@gmail.com | +386 41 812 148 | github.com/NoctsWRLD

PROFILE

Full-stack developer who ships complete products, from the database and authentication to the final deploy. I have built a live study-planning web app with real-time sync and OCR, a React and Express store with secure authentication, and desktop and mobile applications in C# and Flutter. A fast learner who finishes what he starts, I am seeking a junior developer role where I can contribute from day one and keep growing.

PROJECTS

SmartStudy – Study Planner Web App

2025 – present · smartstudyslo.vercel.app

- Built an all-in-one planner for students: subjects, tasks, flashcards and a timetable imported from a photo using OCR.
- Implemented secure sign-in with Firebase Auth and real-time sync across devices with Firestore listeners.
- Added live chat between classmates; designed and wrote the full Slovenian-language interface.

Tech: *React 19, Vite, Tailwind CSS, Firebase, Firestore*

NSA_REACT – Full-Stack Online Store

2024

- Developed a React client and an Express REST API backed by MongoDB, with endpoints for listing and creating products.
- Secured registration and login with bcrypt password hashing; configured CORS and environment-based settings.

Tech: *React, Express, Node.js, MongoDB, bcrypt*

MovieDB – Desktop Movie Catalogue

2024

- Created a C# desktop application with dedicated windows for adding and editing entries, a settings screen and a clean Movie data model, using XAML layouts and data binding.

Tech: *C#, .NET, WPF, XAML*

Used-Car Marketplace (Odkup rabljenih vozil)

2023

- Built a marketplace in PHP and SQL with user registration, login and logout, car listings, reviews and ratings.

Tech: *PHP, SQL*

Also: two Flutter (Dart) mobile apps, a second WPF application and 3D modelling in Blender.

WORK EXPERIENCE

Production Worker – TRISO d.o.o., Ptuj

2023 – 2024

- Worked on the production line manufacturing rulers, with focus on accuracy and consistent quality.

Packing Assistant – KOPIJANOVA d.o.o., Maribor

2021

- Hand-packed school materials in a fast-paced team environment.

Combined paid work with self-directed software development, which built the discipline behind every project above.

EDUCATION

Computer Technician
Prometna šola Maribor, Višja šola L.I.V.E.
Oct 2025 – present
Vocational programme in computer science (EQF level 5)

TECHNICAL SKILLS

Front end
React, Tailwind CSS, Vite, JavaScript, TypeScript

Back end
Node.js, Express, PHP, REST, JSON, bcrypt

Databases
Firebase, Firestore, MongoDB, PostgreSQL, Redis, Cassandra, SQL, LDAP DS

Desktop & mobile
.NET / WPF, XAML, Flutter, Dart

3D
Blender

Tools
Git, Linux, VS Code, Figma

LANGUAGES

Slovenian – Native
English – B2
Croatian – B2

STRENGTHS

- Takes products from idea to deployment
- Decides early what to cut and what is essential
- Quick to learn new stacks and tools
